

## Epic commits to:

- Identify and use materials and processes which reduce the risk of global pollution.
- Promote natural resource conservation by encouraging efficient use of energy, minimising the use of raw materials and where practical using recycled and recyclable materials.
- Taking a proactive approach to environmental management.
- Minimising discharges, emissions, waste and their effects on the environment and at the same time maximising recycling.
- Ensure compliance with environmental legislation, regulations and other local requirements.
- Document procedures and continuously monitor progress in environmental performance through regular measurement, review and audit, utilising a management system compliant with ISO14001.
- Encourage our suppliers and contractors to maintain sound environmental practices.
- Ensure that all employees are made aware of environmental issues on site through a programme of training relevant to their roles. We encourage our employees to walk, jog, cycle or lift share to work. We espouse the use of Electric Vehicles amongst all of our stakeholders.
- We aim to source from local suppliers where possible. We believe that supporting UK manufacture will help to reduce the carbon footprint associated and our resourcing needs.
